### LINK 704, A SIMPLE PHONE FOR A PROFESSIONAL USE.

4 direct memories allow the storage of 4 most dialled numbers or 4 PABX functions.

10 two-touch memories with customised face plate allowing saving most frequently dialled number and for professional activities (ex: Hotel, Hospital...) dedicated features.

Pressing the Auto Redial button once, allow the user to break the line and redial the last dialled number again. This way the user can redial the number without toggle the hook switch.

According to the country where you are, 2 Flash Keys **R100** and **R300** are available
