

LINK PHONE BRIDGE

SKYPE
Compatible

USB
UNIVERSAL SERIAL BUS

-  Skype compatible
-  Call forwarding
-  3 callers conference
-  Conversation recording

LINK PHONE BRIDGE offers advanced functions for your Skype™ communications.

Link Phone Bridge enables you to **make calls** as well through your **analog PSTN line** or through **Skype** with your telephone. It allows you having **two callers at the same time**, **switching** from one to the other and also make a **conference** call with both.

During your absences **Link phone Bridge** allows you **not to miss your calls**. You can **transfer them anywhere** you want (SkypeOut™ account necessary if call forwarding to PSTN line or mobile via Skype)

Link Phone Bridge also allows you **using remotely** your Skype or analog PSTN line. Ideal to **reduce** your **phone bills!**

Link Phone Bridge is **compatible** with any **analog phone**. You can even use your **DECT phone** to enjoy your VoIP communications through Skype.
